DIMENSIONS

14" H

32" ID

46" OD

FIREPIT INSTALLATION

STEP 1: Choose a location that is level and away from your house and low hanging trees or branches. Place the base ring down for a template. Mark a circle 2" from the outside diameter. Remove the base ring when clearly marked.

STEP 2: Dig out the circle and level out the soil approximately 3-4" deep. Remove the sod and dirt to a depth of 3-4".

STEP 3: Compact the soil using a hand tamper. Tamp down substrate (soil) keeping it level. Check the area with a level. Adding and removing soil as needed, tamp again.

STEP 4: Place clean small gravel (#9 or #89 grave/stone) 2.5-3" deep.

STEP 5: Tamp down gravel/stone keeping it level.

STEP 6: Place first course and use rubber/plastic mallet to establish a level bottom course.

STEP 7: Continue to install the interlocking pieces 3 layers high. No adhesive needed.

STEP 8: Fill the outer perimeter with the small gravel. Complete with putting on the four piece caps. Adhesive is optional.
