Granite

SQUARE FIREPIT

Square Firepit Dimensions

Inside - 31 1/2" x 31 1/2"

Outside - 47 1/2" x 47 1/2"

Metal - 30 1/2" x 30 1/2"

Height - 16"

***Metal insert sold separately**

Available colors

FIREPIT INSTALLATION

(APPLICABLE TO BOTH ROUND AND SQUARE FIREPITS)

STEP 1

STEP 2

STEP 3

STEP 4

Choose a location that is level and away from your house and low hanging trees or branches.

For Round: Place the base ring down for a template. Mark a circle 2" from the outside diameter. Remove the base ring when clearly marked.

For Square: Measure a 48"x48" square and clearly mark.

Dig out the circle and level out the soil approximately 3-4" deep. Remove the sod and dirt to a depth of 3-4".

Compact the soil using a hand tamper. Tamp down substrate (soil) keeping it level. Check the area with a level. Adding and removing soil as needed, tamp again.

Place clean small gravel (#9 or #89 grave/stone) 2.5-3" deep.

STEP 5

STEP 6

STEP 7

STEP 8

Tamp down gravel/ stone keeping it level.

Place first course and use rubber/plastic mallet to establish a level bottom course.

Continue to install the interlocking pieces 3 layers high. No adhesive needed.

Fill the outer perimeter with the small gravel. Complete with putting on the four piece caps. Adhesive is optional.
